

# MONSTROUS LANTERNS

Children, are you ready to decorate the windows of your rooms for the spookiest night of the year?

Get yourself what you need and make these **Halloween-lanterns** with me!

## YOU WILL NEED:

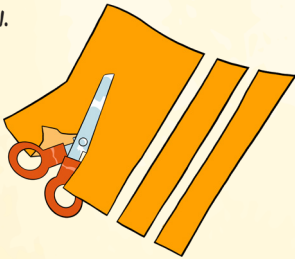

- Glass jars in various sizes (jam jars or chocolate spread jars)
- Tissue paper in various colours
- Scissors
- Vinyl glue (PVA glue)
- Candles

My lantern will have the form of a **pumpkin**, but you can make also others with bats, ghosts or witches.

## PROCEDURE:

1.

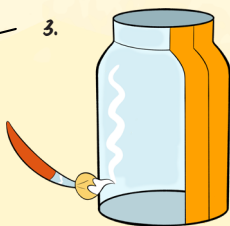

Cut the tissue paper in enough stripes to cover the outer side of the jar.

2.

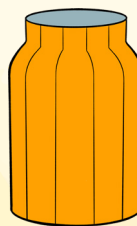

Make a mixture of  $\frac{1}{4}$  of water and  $\frac{3}{4}$  of glue and apply this mixture on the outside of the jar.

3.

Put the tissue paper stripes on the wet surface, overlapping them slightly.

4.

After letting it to dry, cover with a second layer of the water-glue mixture to fix everything.

5.

While your letting the glue to dry, draw the eyes, nose and mouth of the pumpkin on black tissue paper and cut it out.

6.

Fix the black parts on the jar with more water-glue mixture, just as you did with the orange parts. Put a small candle in the jar and your lantern is ready.
