SALZBURG WINTER SCHOOL

PEDIATRIC DISASTER MEDICINE: FOUNDATIONS AND FUTURE

MARCH 3RD-7TH, 2025

PARACELSUS
MEDICAL
UNIVERSITY

WINTER SCHOOL PEDIATRIC DISASTER MEDICINE: FOUNDATIONS AND FUTURE

The program is a collaboration between Paracelsus Medical University (PMU), Uniklinikum Landeskliniken Salzburg (SALK), the World Association for Disaster and Emergency Medicine - European Chapter (WADEM-EU), the European Council for Disaster Medicine (ECDM), The European Centre for Disaster Medicine - San Marino (CEMEC) and the World Humanitarian Forum (WHF).

Goals of the course

Establish Pediatric Disaster Medicine Expertise: Equip participants with foundational knowledge to handle pediatric care in disaster settings.

Hands-on Skill Development: Practical training through simulations to manage pediatric triage and care in emergencies.

Speakers

Sevan Gerard, MA, EMT-P; WADEM-EU
Dr. Don Donahue, WADEM
Dr. Paul Barach
Patricia Frost, RN, PHN, MS, PNP
Dr. Christopher Newton, UCSF Benioff Children's Hospitals
Dr. Roberto Mugavero, CEMEC
Dr. Flavio Salio, WHO EMT
Dr. Tona McGuire
Dr. Chip Shriver
Dr. Greg Ciotto, Harvard BIDMC Disaster Fellowship
Dr. VanTrimpont, ICI Belgium
Dr. John Quinn, Charles University Prague
Dr. Florian Wichlas, PMU School of Medicine
Dr. Virginia Murray
Dr. Qudsia Huda - WDO HQ

COURSE DETAILS

The "Pediatric Disaster Medicine: Foundations and Future" course is a week-long intensive training program focused on pediatric disaster medicine, an emerging field that addresses the unique needs of children in disaster situations. As the first of its kind in Austria, this course will equip healthcare professionals with essential knowledge, practical skills, and hands-on experience necessary to manage pediatric populations in disaster settings.

The program will cover critical topics, including pediatric triage, mental health support for children, disaster preparedness strategies, and the integration of pediatric care into disaster response systems. Participants will benefit from lectures, case studies, and simulations led by internationally recognized experts from leading institutions.
