SAFETY REGULATION

In the showcases there is a planimetry of the camping, where you can find the right indications about the escape way and the assembly point. In case of emergency keep calm and alert immediately the responsables of the camping (00390187824174) and follow their instructions

- It is strickly forbidden to throw water on eletrric devices on fire
- The GPL container must be installed in vertical position, outside the ground, with valve in high, in the specific inconbustible container, which must be placed distant from possible accidental collisions, distant from sunbeam or any warming source. It is forbidden to place any other kind of material in the same container.
- The connection between the tanks, the reducer of pressure and the device in use must be done with specific pipes, according to the actual regulation.
- It is forbidden to tamper with/modify the gas/electricity net of the bungalows and of the mobilhomes.
- It is forbiden to open/close the valves of the gas system

It is forbidden to pour out GPL between portable container or to pour GPL from the container to cars with GPL supply

It is forbidden to keep more than one tank of gas in the pitch (max 25 kg); for tents the max. capacity is limited to 5 kg

It is forbidden to abandon tanks of gas in the pitches. They must be always connected to a burner.

It is forbidden to put on any fire in bungalows/mobilhomes (the use of the gas is strictly and only connected with the use of the kitchen)

It is always forbidden to use barbecue with carbon or wood supply

It is forbidden to use any candle or burner to light up

It is forbidden to use any candle/ mosquito repellent without container. In case of wind you must turn them off. It is forbidden to abandon candles on without any supervision.

Every kind of burner must be placed in a safe, stable and horizontal position, far away from tents, towels, vegetables and any other kind of combustibile materials. It is forbidden to leave unattended burner and any other cooking system on, and it is obligatory to switch the gas distribution valves off after using them.

It is forbidden to use pyrotechnics materials in the camping and in the boundering areas

It is forbidden to throw away cigarettes on the ground ;it's obligatory to throw them in the specific ashtrays after blowing them out.

The distribution of the electricity can be approved only by linking one cable to the box of the light. The plug must be compliant to these indication : CEI 23-12 -220V -max 4 Ampere (880W). Please don't use flawed electric devices, or faulty conductors. The management invites you to respect the rules according to the prescriptions of conformity of the machinery in use and also it invites you to pay attention to their conditions.

It is forbidden to abandon garbages in the pitches, around the campsite and outside the specific rubbish bins for the recilying. We invite all the kind customers to get rid of their garbage in the correct way.
