Lo sviluppo di CORFLEX e CORTEK

Nata per rispondere alle richieste degli sportivi piu' esigenti, la linea Corflex, raggruppa tutti i tessuti elasticizzati che Mectex[®] produce con l'utilizzo del Cordura[®] mentre la linea Cortek raggruppa tutti i tessuti fissi in Cordura[®] e Cordura[®] cotone

Why CORFLEX and CORTEK?

Both lines have been created to respond to the expectations of the most engaged sportsmen: Corflex is inclusive of all stretch fabrics produced by Mectex[®] utilizing Cordura[®]. Cortek will refer to as a grouping of all flat fabrics using Cordura[®] and Cordura[®] blended with cotton.

Mectex[®]

GORFLEX & GORTEK

CORFLEX & CORTEK

Caratteristiche tecniche

Elevata resistenza allo strappo e all'abrasione
Idro e oleorepellenza totale
Massima traspirabilità
Impermeabilità assoluta nelle versioni con resine e membrane
Massima libertà di movimento con Corflex
Easy care

Technical characteristics

Higher tearing and abrasion strength
Total water and stain repellency
