

Vorpa FOAM CLEANER

Foam gun cleaner

products group and information

FOAM CLEANER

Useful for uncured foam residue on:

- can valves, PU-foam gun applicators
- working clothes, working surfaces

Characteristics

- product designed for removing uncured polyurethane foams or adhesives
- it is useful for cleaning of can valves and PU-foam gun applicators
- it can be used with normal cans due to the attachable spray nozzle
- suitable for removing uncured foam residue. The cleaner is excellent for degreasing metal surfaces before application of silicones and polyurethane. The propellant used is ozone friendly

Suggestion for use

- screw Foamgun-Cleaner into the adapter of the gun. Put the trigger of the gun until only clean solvent flows out the nozzle. Not suitable for cured foam. To clean other surfaces, normally spray product by the supplied valve

Attention

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C. Do not pierce or burn, even after use. Do not spray on a naked flame or any incandescent material

how to use it

Accessories

Foamplus gun PU code 3784

Foamplus gun PU PLUS professional model code 3785
