

WAVE PTX™ MOBILE APP BROADBAND PTT APPLICATION

SINGLE APP. MULTIPLE MEDIA.

Turn your phone into a broadband Push-To-Talk (PTT) handset with the WAVE PTX Mobile Application and get instant communication anywhere you have broadband service. Connect your two-way radio system into WAVE PTX and extend talkgroups so that everyone can be part of the conversation, regardless of the device they carry or network they are using.

TWO MODES ONE APPLICATION

Users can select one of two client modes: PTT Radio Mode, which emulates the experience of a traditional two-way radio, or Standard Mode which offers full client functionality.

NOTHING IS FASTER THAN PTT

Get the speed and simplicity of two-way radio communication on your smartphone. Communicate and collaborate with individuals or teams at the touch of a button.

LET EVERYONE BE PART OF THE CONVERSATION

Smartphone and two-way radio users can join the same talkgroups so the back office and front office are always connected. Keep critical team members connected even when out of radio coverage or off duty.

INCREASE THE CLARITY AND SPEED OF COMMUNICATION

Not everything can be expressed efficiently with voice. Push text, video, images and file attachments and ensure everyone clearly gets the message.

KEY FEATURES

PTT Communications – Fast, secure and reliable PTT voice communication at the touch of a button. Collaborate with an individual, predefined group or ad hoc groups created on the fly.

Integrated Messaging – Push text, video, audio, photos and files to individuals or groups. See threaded history for communication details. Store and forward is supported for offline users.

Mapping and Location – Find an address, coordinate a meeting place or share your location with others.

Streaming Video – Optional feature that allows users to share real-time video at the push of a button, increasing communication clarity and improving situational awareness.

SafeGuard Package – add this optional set of 3GPP MCPTT-based features to improve safety, situational awareness, and operational efficiency for all WAVE PTX users.

Real-Time Presence – Set your status and see who is available with real-time presence information – Available, Do Not Disturb or Offline.

FLEXIBLE CHOICE OF DEVICES AND ACCESSORIES

Get the right tool for the job – choose the smartphone or tablet you prefer and the accessories that best fit your needs and budget.

Smartphones and tablets

Android and iOS

Accessories

Add accessories like headsets, earpieces and remote speaker microphones to help users get the most from their device

CONNECTING YOUR TEAMS ANYWHERE

By extending instantaneous group communication to users on smartphones and tablets as well as two-way radios, the WAVE PTX Mobile Application provides connectivity without limits. The result is team members that can stay connected at the push of a button wherever they may be, whatever network they are using.
